

Lifting modules and lifting/lowering valves type HMB, HMC, HMT, and HSV, HZV etc.

These lifting modules and lifting/lowering valves were developed especially for the actuation of hoists e.g. turret trucks, order pickers, reach trucks and walkie stackers. They consist of a combination of various valve types (flow control valves, throttles, directional valves) suited for the control of the main lift and for other additional functions. The internal control layout of the main valve is very flexible and can be tailored to meet exactly the requirements of the drive concept (constant delivery or speed controlled pump) as well as the intended application.

This valve design can cope also with additional functions being required by simply adding directional seated or directional spool valve sections (e.g. type SWR or SWS) to the main valve body.

Selection table

Field of application and drive concept

Device type	Dr	ive con	cept	Application							
			Scissor lift	Miniature stacker,	Counter balance	Reach truck	Order picker (warehouse)				
	1	2	3		Walkie stacker	truck		(no man aloft)	(man aloft)

Symbols

Single devices: Lifting modules and connection blocks: HSV HZV **HST** HMC **HMTL HMB** LS MΡ HSN HMR HSW SWR **HMT** HMS **HMF**

Further versions

• Connection blocks type SWR... with flow divider

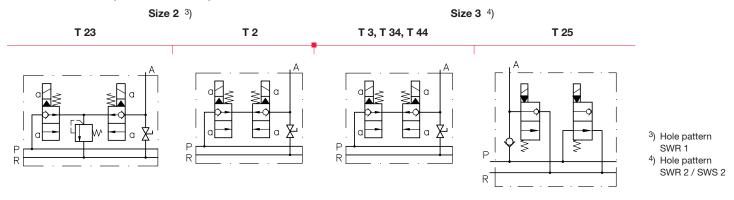

- Connection blocks type SWR... with shut-off valves for P and H (lifting)
- Connection blocks type SWR... with/without pressure limiting valve

2009 **2.2-**33

²) Also for external additional functions

Symbols

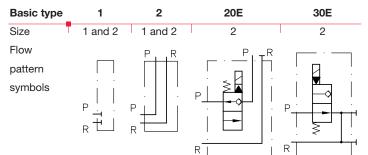

Intermediate blocks (main and initial lift)

Additional versions (intermediate blocks)

- Various intermediate blocks for turret forks at order pickers;
 function rotate / reach / lifting / lowering
- Directional spool valve sections type SWR1 with additional functions;
 Directional spool valve sections type SWS 2
 (see also "Additional information")

End plates

Additional versions (end plates)

- End plates with two pump ports and one return port
- End plates with proportional idle circulation valve
- End plate with solenoid valves to the control of a parking brake

Reach

Order examples

HMT 34-1/200-70F -G/M/0/2 AN40 BN130

-D/M/0/02

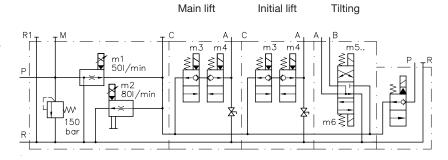

-30E-P12/G 24

Lifting module type HMT, size 3, port size 4 with pressure limiting valve (set for 200 bar), outflow controller with 70 lpm metering throttle (blocked in idle position); section G with shock and suction valves is part of the ancillary block (settings 40 and 130 bar); end plate with idle circulation valve (open in idle position), proportional-solenoid voltage for the flow control valve 12V DC, solenoid voltage for directional spool valve and directional seated valves 24V DC.

Main lift Rotate Rotate

HMC 33-1/150-50/80F-T3 T3/D-20E-G 24

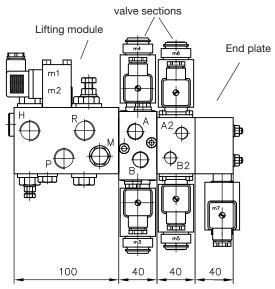

Lifting module type HMC, size 3, port size 3 (G 3/4 (BSPP)) with pressure limiting valve (set for 150 bar), 3-way flow control valve with metering throttle up to 50 lpm, 2-way flow controller up to 80 lpm (blocked in idle position), two intermediate blocks type T3 with seated valves and one directly added directional spool valve section type SWR 2 flow pattern D, end plate with additional port P and R as well as a shut off valve for port P, solenoid voltage 24V DC.

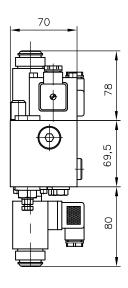

Dimensions

(see order examples)
